Re: SANTA CLARA COUNTY DATA SOURCE DIRECTORY

The Importance of Data to Community Decisionmaking

Having accurate, up-to-date data concerning current conditions and trends is essential to good planning, sound investment decisions, efficient service provision, and intelligent forecasting of community needs.

This "Santa Clara County Data Source Directory" is intended to aid local agencies, businesses, organizations, and individuals in finding the data they need to make informed decisions that will help shape our county's future. It identifies some of the most useful sources of the most frequently requested data concerning Santa Clara County.

The County Planning Office as a Data Source

The County Planning Office has historically been a major source of data concerning current conditions and trends within Santa Clara County, and we continue to receive numerous data requests every day. But, as with most government agencies these days, we are having to look for ways to provide quality service with limited resources. Consequently, we have prepared this directory to assist those who need data we cannot readily supply.

Your Comments and Suggestions Are Invited

This is the first edition of this directory. We anticipate that we will be revising and expanding this publication in the future. Your comments and suggestions concerning additional categories and/or sources of data that should be included in future editions are invited.

For Further Information

For further information concerning the Data Source Directory, contact Cheryl Reid at the Santa Clara County Office of Planning at (408) 299-2521.

* INTRODUCTION

Purpose of This Directory

The Santa Clara County Office of Planning receives many inquiries requesting data concerning current conditions and trends in Santa Clara County -- sometimes more requests than we can respond to promptly. This Data Source Directory is intended to aid individuals, agencies, organizations, and businesses obtain data they need concerning Santa Clara County.

Organization of Information

Data sources in this directory are grouped under broad subject categories which are listed in alphabetical order -- from "Agriculture" to "Transportation". Within each section are listed the primary data sources for data about that subject.

Included under each data listing is information concerning: 1. The geographic area for which data is reported (e.g. countywide, city-by-city, Census tract, etc.); 2. The agency, organization, or business responsible for generating or compiling the data, and; 3. The frequency of publication (i.e. how often the data is published). Some titles used are the formal titles of particular publications, others are general descriptions of the data available.

Availability of Data

The availability of data cited varies. Some is available on a subscription basis; some is free upon request; some can be used only as reference information at the source location. The addresses and phone numbers of the agencies, organizations, or businesses from whom the data is available are listed in the "Source Addresses and Phone Numbers" section at the back of this publication.

Other Sources of Information

Many questions related to census material, government documents, and other published data can be answered by the reference desk at local public libraries. Local libraries in Santa Clara County with major reference capabilities, including government documents, are listed in the "Source Addresses and Phone Numbers" section at the back of this publication.

To Suggest Additions or Corrections

This is the first edition of the Data Source Directory. Suggestions concerning additions, corrections, or omissions from future editions are invited and should be directed to:
